## February Newsletter

Dear parents!

Welcome to the month of February.

Our themes for the month will be focused on Valentine's Day ❤️ and also dental health 🦷

Activity's that we will be engaged in will focus around those , with lots of hands on and working one on one directed activities .

We continue to work daily on our fine motor skills.

Our letters for the month will be K, A, M and N We will celebrate Valentine's Day by exchanging cards with our friends in our classroom , and we will be enjoying a little valentine treat.

Thank you  
Ms Lindsey

Coming in March

Ages and Stages

Workshop By Ms. Elsie Davis CPM

We had a busy month in January. The children had a great time working on their letters especially R for Robots!

Welcome to February.... Our LOVE month! It may be the shortest month of the year but we pack it with a lot of fun and learning.

Our theme for the month is dental health, ground hogs, zoo animals and

Valentine's day! A lot of our crafts will revolve around our colors pink and

purple as well as our shape.... the HEART!

As Valentine's day approaches we will continue to work on our friendship

skills and learn how to use our words to express how we feel and problem

solve with kind words and a kind voice.

Valentine's day will be celebrated on Friday, February 14th. Your child is

welcome to bring in cards to hand out to each of their friends during the

party. It's a fun day for the children and another way to spread the LOVE!

Happy Birthday to Rupert this month!

Ms. Trish

February Newsletter: Bread, Cooking, Love & Milestones!

Dear Families,

This February, we're diving into a Bread and Cooking Study! Students will explore the science of bread-making, from measuring ingredients to understanding how yeast works. We'll also learn about different breads around the world and the history behind them—all while connecting math, literacy, and technology to the process.

Key Highlights:

## 1. Bread and Cooking Study:

Students will get hands-on in the kitchen, experimenting with baking and learning the cultural significance of bread.

We'll explore how bread rises, why we use certain ingredients, and what makes bread an essential food worldwide.

## 2. 100th Day of School (Feb. 10th):

On February 10th, we'll celebrate the 100th day with fun challenges and activities—like counting to 100 in creative ways, making collage with some scrap papers and feathers on the number 100.

## 3. Valentine's Day (Feb. 14th):

We'll celebrate kindness and friendship with Valentine's Day cards and sweet messages for classmates. It's a great time to reflect on the importance of love and friendship in our class.
